

Custom Care Nursing

Our Statement of Purpose

1. We believe home health services are an essential part of the health delivery system. By providing continuing care to clients in their own homes, home health services minimize the effects of illness, accident or disability.
2. Custom Care recognizes the intrinsic worth of aged, diseased and or disabled persons. We believe the contributions of these persons are no less important than the contributions of other members of our society. Custom Care recognizes that these persons are entitled to retain or regain their maximum participation in society.
3. We recognize that the aging process is an unavoidable part of life. We understand chronic disease and disability may be part of that process.
4. In providing care to individuals, Custom Care recognizes that clients and families have inalienable rights to self-determination. They have the right to participate in planning for their care, to make decisions about their care and to maintain their independence as long as feasible.
5. Health education is an integral part of Custom Care's program.
6. Custom Care recognizes that staff behavior, attitudes, knowledge and understanding have an important influence on helping attain and maintain their optimum health.
7. Therefore, we are committed to the rehabilitation of aged, diseased, and or disabled individuals within the structure of their home environments, allowing maximum contribution, independence and retention of self respect.
8. When rehabilitation or recovery is not realistic, we commit to providing end of life care to individuals with the up most compassion with the appropriate care and coordinated services that will enhance their dignity and self respect.
